The unit of observation for the Supreme Court dataset is 2 weeks encompassing a total number of political protests.

#### Variables:

- caseID: Case description, includes year, and specific case #.
- docketID: Unique identifier assigned by a court or agency to a case or rulemaking proceeding, acting as a tracking number for all associated documents and proceedings.
- CaseIssuesID: Further specific case identification.
- voteID: Unique identifier for vote which takes place in a specific case. In place to delineate potential re-votes, and/or vote annulments.
- dateDecision: Date on which case decision was made and confirmed.
- decisionType: Delineation between # of decision outcomes.

## Dataset #2: Bi-weekly Protest Data 2017-2024

The unit of observation is the individual protest events.

### Variables:

- Date: Date of event occurrence.
- Locality: City in which event occurs.
- State: US State where event occurs.
- Location\_detail: Additional information on specific venue where protest occurred.
- Online: Binary value showing whether the event was virtual or not (0 - no, 1 - yes).
- Type: Description of what type of protest or demonstration occurred.

- Title: Title given to protest.
- Macroevent: Irrelevant column.
- Organizations: Description of any supporting organizations.
- Participants: Description of specific participating parties - redundant given subsequent column.
- Actors: Description of specific participating parties.
- Claims: Reason for protest event taking place.
- Claims\_summary: Summarized version.
- Claims\_verbatim: Word-for-word purpose.
- Issue\_tags\_summary: Summarized version.
- Issue\_tags\_verbatim: Word-for-word purpose.
- Valence: Whether the issue position is more uniform across the electorate or not.
- Issues: Categorization of event taking place.
- Size\_text: Surplus information.
- Size\_low: Surplus information.
- Size\_high: Surplus information.
